Analisis Rasionalitas Antibiotik Di Fasilitas Pelayanan Kesehatan Apt. Sunandar Ihsan, S.Farm., M.Sc., 2021-11-01 Penggunaan antibiotik masih memberikan banyak masalah dalam penggunaannya terutama di sarana kesehatan. Dari berbagai penelitian ditemukan, penggunaan yang tidak rasional tersebut berhubungan dengan dosis, ketepatan pemilihan obat dan durasi penggunaan yang terlalu singkat atau terlalu lama. Tentu saja hal tersebut berakibat buruk selain penyakit tidak sembuh total, dan yang paling ditakutkan adalah resistensi antibiotik sehingga biaya kesehatan yang diperlukan pun meningkat. Hasil kajian mutakhir menunjukkan pola resistensi antibiotik berbeda-beda antarnegara bahkan antarsarana kesehatan. Hal ini menyulitkan klinisi dalam pemilihan antibiotik yang sesuai dengan kondisi penyakit pasien yang berpotensi pada ketidakrasionalan penggunaan antibiotik. Diperlukan evaluasi rasionalitas secara berkala untuk meningkatkan kualitas penggunaan antibiotik untuk menekan angka pertumbuhan penyakit infeksi. Buku ini fokus pada bagaimana metode yang digunakan untuk melakukan penilaian antibiotik pada pasien. Di dalamnya juga diperkenalkan apa itu antibiotik secara struktur, mekanisme, dasar penggunaan antibiotik di klinik sampai pada regulasi penggunaannya. Kelebihan buku ini ada pada model evaluasi rasionalitas antibiotik yang telah digunakan dalam penelitian di perguruan tinggi. Yang menarik dalam buku ini yaitu diberikan penjelasan teknis untuk melakukan analisis dengan memberikan metodologi yang digunakan. Di dalamnya, disampaikan tentang cara pemilihan dan kriteria sampel, jumlah sampel yang dibutuhkan, prosedur pengumpulan data serta cara analisis data disertai dengan contoh kasus. Selain itu, alasan filosofis digunakannya metode juga diberikan secara ringkas. Analisis Rasionalitas Antibiotik Di Fasilitas Pelayanan Kesehatan ini diterbitkan oleh Penerbit Deepublish dan tersedia juga dalam versi cetak.

Principles of Nutritional Assessment Rosalind S. Gibson, 2005 With over 200 newly drafted figures & many new tables drawn from the wealth of data published over the last 15 years, this new edition has been thoroughly revised.

Handbook of Famine, Starvation, and Nutrient Deprivation Victor R. Preedy, Vinood B. Patel, 2019-03-22 This book addresses the causes and effects of nutrient deficiencies along the cell-to-communities continuum. The book is primarily concerned with a lack or deficiency of one or more micro- or macronutrients in connection with malnutrition, under nutrition, and starvation. Embedded within the deficiency states is acute restriction whereby food is withdrawn completely for short periods, as when individuals are adhering to religious requirements or undergoing surgical procedures. Further downstream is the consumption of a fraction of the normal diet, as when individuals are dieting or when there is restriction in the amount or variety of food available. The causes of such reductions in dietary intake are varied and also include the social context of poverty, financial limitations, and famine. Refugees and displaced persons may also be vulnerable to under nutrition or total starvation. Diseases may also impact on the total food consumed, such as when there are physical impediments (intestinal obstruction or dysphagia) or anorexia (induced by organic disease or as a disease process per se, ie, anorexia nervosa). This book, organized as approximately 125 chapters in 17 major sections, covers the variable manifestations of dietary restrictions on cells, whole organs, the individual, and societies.

Community and Family Health Nursing - 1st Indonesian Edition Mary A. McEwen Nies (Melanie), Melanie McEwen, PhD RN CNE Anef, 2018-09-17 Community and Family Health Nursing - 1st Indonesian edition

Life After Logging E. Meijaard, Douglas Sheil, Robert Nasi, David Augeri, Barry Rosenbaum, Djoko Iskandar, Titiek Setyawati, Martjan Lammertink, Ike Rachmatika, Anna Wong, Tonny Soehartono, Scott Stanley, Timothy O'Brien, 2005-01-01 This book presents a technical review of ecological and life history information on a range of Bornean wildlife species, aimed at identifying what makes these species sensitive to timber harvesting practices and associated impacts. It addresses three audiences: 1) those involved in assessing and regulating timber harvesting activities in Southeast Asia, 2) those involved in trying to achieve conservation goals in the region, and 3) those undertaking research to improve multipurpose forest management. This book shows that forest management can be improved in many simple ways to allow timber extraction and wildlife conservation to be more compatible than under current practices. The recommendations can also be valuable to the many governmental and non-governmental organisations promoting sustainable forest management and eco-labelling. Finally, it identifies a number of shortcomings and gaps in knowledge, which the hope can interest the scientific community and promote further research. This review is, an important scientific step toward understanding and improving sustainable forestry practices for long-term biodiversity conservation. Even in the short term, however, significant improvements can be made to improve both conservation and the efficiency of forest management, and there is no need to delay action due to a perceived lack of information. In the longer term it is expected that the recommendations from this review will be implemented, and that further research will continue to help foster an acceptable balance among the choices needed to maintain healthy wildlife populations and biodiversity in a productive forest estate.

Handbook of Anthropometry Victor R. Preedy, 2012-02-02 Although its underlying concept is a relatively simple one—the measurement of the human body and its parts—anthropometry employs a myriad of methods and instruments, and is useful for a variety of purposes, from understanding the impact of disease on individuals to tracking changes in populations over time. The first interdisciplinary reference on the subject, the Handbook of Anthropometry brings this wide-ranging field together: basic theory and highly specialized topics in normal and abnormal anthropometry in terms of health, disease prevention, and intervention. Over 140 self-contained chapters cover up-to-date indices, the latest studies on computerized methods, shape-capturing systems, and bioelectrical impedance, data concerning single tissues and whole-body variables, and reports from different areas of the world. Chapters feature helpful charts and illustrations, cross-references to related chapters are included, and key points are presented in bullet form for ease of comprehension. Together, the Handbook's thirteen sections entail all major aspects of anthropometrical practice and research, including: Tools and techniques.

Developmental stages, from fetus to elder. Genetic diseases, metabolic diseases, and cancer. Exercise and nutrition. Ethnic, cultural, and geographic populations. Special conditions and circumstances. The Handbook of Anthropometry is an invaluable addition to the reference libraries of a broad spectrum of health professionals, among them health scientists, physicians, physiologists, nutritionists, dieticians, nurses, public health researchers, epidemiologists, exercise physiologists, and physical therapists. It is also useful to college-level students and faculty in the health disciplines, as well as to policymakers and ergonomists.

Discovery and Selection of Semantic Web Services Xia Wang, Wolfgang A. Halang, 2012-09-21 For advanced web search engines to be able not only to search for semantically related information dispersed over different web pages, but also for semantic services providing certain functionalities, discovering semantic services is the key issue. Addressing four problems of current solution, this book presents the following contributions. A novel service model independent of semantic service description models is proposed, which clearly defines all elements necessary for service discovery and selection. It takes service selection as its gist and improves efficiency. Corresponding selection algorithms and their implementation as components of the extended Semantically Enabled Service-oriented Architecture in the Web Service Modeling Environment are detailed. Many applications of semantic web services, e.g. discovery, composition and mediation, can benefit from a general approach for building application ontologies. With application ontologies thus built, services are discovered in the

same way as with single domain ontologies, and the mediation problem between service ontologies is solved. Further, an ontology-based approach to improve service discovery is proposed and validated. Within the service model, a service selection approach oriented at quality criteria is proposed. It normalises diverse qualities of a service in their respective metrics and employs a service selection algorithm based on soundness.
